Regulations affecting Aneeta

AS1288 – glass in buildings

Section 4 – Design for Wind Loading

Maximum Allowable Glass Spans - Sashless Windows from above standard

Checked for Wind load and Deflection Serviceability as per AS1288-2006; Section 4.4 and Section 4.4.6

Allowable width for double hungs / heights for horizontal sliders

Design Wind Pressure (Pa) either P_u or P_s

P_u	700	1000	1500	2300	3300	4500
P_s	500	700	1000	1500	2200	3000
Correspond N rating	N1	N2	N3	N4	N5	N6
6.38 Laminated	1319	1104	901	728	608	520
6mm Float	1362	1140	931	751	627	537
6mm Toughened	1428	1277	1134	990	872	786
10.38 Laminated	2149	1798	1468	1185	990	847
10mm Float	2169	1814	1481	1196	999	855
10mm Toughened	2389	2135	1896	1656	1458	1315

For double glazed a rule of thumb is that you use one glass thickness plus a half of the other i.e.. 4/8/4 tuff would be the same as 6mm tuff above, 4/6/6 would be similar to 7mm to 8mm
